

MobileIron Cloud: Mobile and Cloud Security Bundles

MobileIron provides organizations with a unified platform for mobile and cloud security. Users enjoy seamless access to business apps and data through secure mobile devices and cloud services while still maintaining complete control over their privacy. IT benefits from advanced mobile and cloud security capabilities such as posture-based access control and selective wipe to prevent business data from falling into the wrong hands. By providing a robust Mobile and Cloud security solution that supports both business productivity and IT security requirements, MobileIron enables today's enterprises to become truly Mobile and Cloud first.

MobileIron's Enterprise Mobility Management (EMM) bundles are specifically designed to support the three main phases of the Mobile First journey: 1) Device and Email Security, 2) Mobile App and Content Enablement, and 3) Business and IT Transformation. Each bundle provides essential capabilities required to successfully achieve each phase of the Mobile First journey. With the MobileIron EMM platform, organizations have the foundation they need to build a mobile security program that enables choice while addressing specific mobile security requirements.

In addition to the EMM bundles, MobileIron's cloud security products help reduce security risks as organizations transition from a legacy PC to a Mobile-Cloud environment. As mobile devices, apps, and cloud services proliferate across the organization, MobileIron provides IT with the cloud-based security platform they need to protect all their apps and data on any network or mobile device.

Mobile Security

MobileIron Cloud EMM Silver Bundle

The EMM Silver bundle provides all the essential capabilities required to build the foundation of a Mobile First enterprise. The EMM Silver bundle offers capabilities that allow for seamless device onboarding, configuration of security settings, app distribution, policy enforcement, and remediation. The EMM Silver bundle includes:

- Cloud – Central administrative console
- Sentry – Secure enterprise gateway
- Apps@Work – Enterprise app store
- Content catalog – Secure document catalog and publishing, storage for up to 25 files at 2 MB each

MobileIron Cloud EMM Gold Bundle

The EMM Gold bundle is designed for customers ready to take the next step of the Mobile First Journey by providing secure apps and content on any mobile device. The Gold bundle includes:

- Cloud – Central administrative console
- Sentry – Secure enterprise gateway
- Apps@Work – Enterprise app store
- Content catalog – Secure document catalog and publishing, storage for up to 50 files at 25 MB each
- Email+* – Secure email/PIM app for iOS
- AppConnect* – Secure app container and app-specific VPNs for AppConnect-enabled apps
- Docs@Work* – Security and access control for enterprise content repositories
- Web@Work* – Secure web browser for iOS

MobileIron Cloud EMM Platinum Bundle

The EMM Platinum bundle is designed for organizations that have a solid mobile foundation and are ready to enter the advanced stages of the Mobile First journey. The Platinum bundle includes:

- Cloud – Central administrative console
- Sentry – Secure enterprise gateway
- Apps@Work – Enterprise app store
- Content catalog – Secure document catalog and publishing, storage for up to 50 files at 25MB each
- Email+* – Secure email/PIM app for iOS
- AppConnect* – Secure app container and app-specific VPNs for AppConnect-enabled apps
- Docs@Work* – Security and access control for enterprise content repositories
- Web@Work* – Secure web browser for iOS
- Tunnel – Secure per-app VPN for iOS, Android for Work, and Windows 10
- Help@Work – Help desk tools for remote viewing and control over end-user devices
- ServiceConnect Integrations** – Streamline IT workflows with the MobileIron App for Splunk Enterprise and integrations with ServiceNow

Cloud Security

MobileIron cloud security products are designed for modern organizations that leverage cloud services to support a variety of business-critical processes and increase user productivity.

- MobileIron Access – Conditional access control for cloud services such as Box, Google Apps for Work, Office 365, and Salesforce

* Available on iOS6 and above.

** ServiceConnect integrations available with the Platinum bundle includes MobileIron-developed software to integrate with specific third-party products and services. API-based integrations do not require the purchase of the Platinum bundle.

Note: Availability of certain capabilities might vary by mobile operating system. Please check with a MobileIron representative for availability
